

## TAKING PRESCRIPTIONS FOR EPILEPSY?

# Research Study

*Use a free, new app to automatically  
track your epilepsy medication use!*

You may be eligible if:

- ✓ You're over 18
- ✓ Have 1-3 current prescriptions for anticonvulsants
- ✓ Have an Android smartphone

We are interested in finding out if a new technology that connects your pill bottle to your smartphone may be helpful for people taking medications for epilepsy. You will not need to complete any extra visits--just use the app on your phone! For more information, please talk to your provider today or contact Jennifer Bingham:
